## Postoperative Physiologic and Metabolic Derangement Rate Technical Specifications

Patient Safety Indicators 10 (PSI 10)

AHRQ Quality Indicators<sup>™</sup>, Version 5.0

March 2015

**Provider-Level Indicator** 

Type of Score: Rate

## **Description**

Postoperative acute renal failure (secondary diagnosis) with dialysis per 1,000 elective surgical discharges for patients ages 18 years and older. Excludes cases with principal diagnosis for acute renal failure; cases with secondary diagnosis for acute renal failure present on admission; cases with secondary diagnosis of acute renal failure and dialysis before or on the same day as the first operating room procedure; cases with acute renal failure and acute myocardial infarction, cardiac arrhythmia, cardiac arrest, shock, hemorrhage, gastrointestinal hemorrhage or chronic renal failure; and obstetric cases.

[NOTE: The software provides the rate per hospital discharge. However, common practice reports the measure as per 1,000 discharges. The user must multiply the rate obtained from the software by 1,000 to report events per 1,000 hospital discharges.]

## **Numerator**

Discharges, among cases meeting the inclusion and exclusion rules for the denominator, with either:

 any secondary ICD-9-CM diagnosis codes for acute renal failure and any-listed ICD-9- CM procedure codes for dialysis

#### ICD-9-CM Acute renal failure diagnosis codes:

| 5845 | AC KIDNY FAIL, TUBR NECR | 5849 | ACUTE KIDNEY FAILURE NOS |
|------|--------------------------|------|--------------------------|
| 5846 | AC KIDNY FAIL, CORT NECR | 586  | RENAL FAILURE NOS        |
| 5847 | AC KIDNY FAIL, MEDU NECR | 9975 | SURG COML-URINARY TRACT  |
| 5848 | ACUTE KIDNEY FAILURE NEC |      |                          |

#### ICD-9-CM Dialysis procedure codes:

3995 HEMODIALYSIS 5498 PERITONEAL DIALYSIS

### **Denominator**

Elective surgical discharges, for patients ages 18 years and older, with any-listed ICD-9-CM procedure codes for an operating room procedure. Elective surgical discharges are defined by specific DRG or MS-DRG codes with admission type recorded as elective (SID ATYPE=3).

#### See Patient Safety Indicators Appendices:

- Appendix A Operating Room Procedure Codes
- Appendix D Surgical Discharge DRGs
- Appendix E Surgical Discharge MS-DRGs

#### Exclude cases:

- with a principal ICD-9-CM diagnosis code (or secondary diagnosis present on admission<sup>1</sup>) for acute renal failure (see above)
- with any dialysis procedure (see above) occurs before or on the same day as the first operating room procedure<sup>2</sup>
- with a principal ICD-9-CM diagnosis code for (or secondary diagnosis present on admission) acute myocardial infarction
- with a principal ICD-9-CM diagnosis code for (or secondary diagnosis present on admission) cardiac arrhythmia
- with a principal ICD-9-CM diagnosis code (or secondary diagnosis present on admission) for cardiac arrest
- with a principal ICD-9-CM diagnosis code (or secondary diagnosis present on admission) for shock
- with any a principal ICD-9-CM diagnosis code (or secondary diagnosis present on admission) for hemorrhage
- with any secondary ICD-9-CM diagnosis codes for acute renal failure (see above) and a principal ICD-9-CM diagnosis code (or secondary diagnosis present on admission) for gastrointestinal hemorrhage
- with any secondary ICD-9-CM diagnosis codes for acute renal failure (see above) and a principal ICD-9-CM diagnosis code (or secondary diagnosis present on admission) for chronic renal failure
- MDC 14 (pregnancy, childbirth and the puerperium)
- with missing gender (SEX=missing), age (AGE=missing), quarter (DQTR=missing), year (YEAR=missing), or principal diagnosis (DX1=missing)

#### ICD-9-CM Acute myocardial infarction diagnosis codes:

|       | , louis iii, sooul alai iiilai olioii a |       |                           |
